

# **NORTHWEST INDIANA COMPUTATIONAL GRID (NWIC GRID) PROJECT WORKSHOP**

**August 10      9:30 AM—9:00 PM**  
**August 11      8:00 AM—2:30 PM**

**At the Calumet Conference Center  
On the Purdue Calumet Campus**

---

## **Agenda to include:**

**Presentations of Proposals for Research by Faculty from  
Purdue University Calumet, Notre Dame, &  
Purdue University West Lafayette**

**Updates from the Project's Technical Infrastructure Group  
on the status of the NWIC Grid**

**Presentation by the Department of Energy**

This project entails the building of a scalable, high speed, high bandwidth, science and engineering-driven fiber optic network for northwest Indiana. This network will make possible the sharing, enhancement, and integration of network, computational, storage, middleware, and visualization resources at Notre Dame, Purdue West Lafayette, and Purdue Calumet. The NWIC Grid project will yield world-class advances in the underlying technologies of grids and high performance computing, which will, in turn, be used to support high-value, high-return, scientific research projects.

For On-Line Registration and Additional Information go to:  
[www.nwicgrid.org](http://www.nwicgrid.org)

Registration deadline: July 28, 2006
